

What is CommandAlert

CommandAlert is the ultimate fully programmable remote control SMS mechanism to monitor and/or control devices or applications in homes, offices and farms **via your cell-phone**.

Use your Cell-Phone to;

Control Access (Open & Close);

- Garages
- Gates/doors
- Offices

Monitor & Control Appliances (Remotely)

- Temperature on fridges etc
- Water levels
- Fuel Levels
- Monitor power failures

Control (Switch on/off)

- Lights
- Security systems
- Sprinkler systems
- Pumps

CommandAlert R2250.00

BETRAYING CRIMINALS

How Does It Work

CommandAlert has a built in GSM 'phone' and processor that notifies you of remote events, and enables you to control equipment at remote locations via simple, SMS/text instructions sent to/from your cell phone.

CommandAlert is easily set up and comes with simple 'Wizard' driven software using 'If Then' statements. It operates with any cell phone network, but SIM card is not included.

Other Features Include:

- Fully integrated quad-band GSM engine.
- Configured via USB (cable included).
- 2 x 10A relay outputs (expandable – see "ExpandAlert").
- 2 x isolated inputs (expandable – see "ExpandAlert").
- Support for external temperature sensor.
- Prepaid airtime checking supported.
- "Please Call me" supported.
- Internal Real-time clock.

Note: CommandAlert provides some security interfacing, but if you need a via-SMS technology dedicated to security, then the fully wireless TextAlert is more suitable.

BETRAYING CRIMINALS

Who Needs It and Why?

Farmers (via SMS on your phone)

Monitor & Control; Cold Rooms, Water Levels, Fuel Levels, Compressors, Pumps. Power Failures, Cable or other theft etc

Access Control – open gates, doors etc by authorised cell-phones only

Businesses

Monitor - Server Rooms & Security Sites- SMS notification if temperatures change, power fails, battery status, smoke detection etc; and can immediately reset servers/activate systems via SMS.

Access Control- Open doors and gates using missed call from Authorised phones only. Set ad hoc or regularly scheduled time and date access periods for staff, service provider, deliveries, etc.

Golf & Security Estates

Access Control- Save money & improve Security: Grant access control to up to 200 Cell numbers.

Monitor & Control- Lights, Sprinkler systems, Power failures, Generators etc

Guest Houses

Monitor & Control- Lights, Sprinkler Systems, Power failures, Generators etc

Access Control- Save money and improve security integrity: Have the centralised ability to grant access control to up to 200 cell phones/individuals. No more lost remotes.

At Home

Home Automation – Open Gates & Garages, Control Lights, Sprinklers, Pool and appliances remotely from your Cell-phone
