A few products in our range

VoiceAlert

When you're home and vulnerable to attack, precise and clear verbal warnings that pinpoint intruders as they trespass can be life-saving. The imported U.S.A. solution keeps >100,000 South Africans safe.

TextAlert

Detailed intruder warnings SMS'd directly to all who need to know, and sirens/armed response triggered too. Completely wireless and simple to install and use.

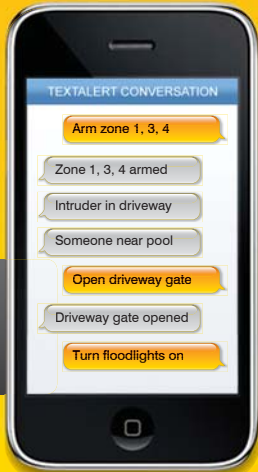

VideoAlert

A live video feed is worth the proverbial 'thousand words' – but wired video is prohibitively expensive. VideoAlert answers the need; wirelessly and affordably.

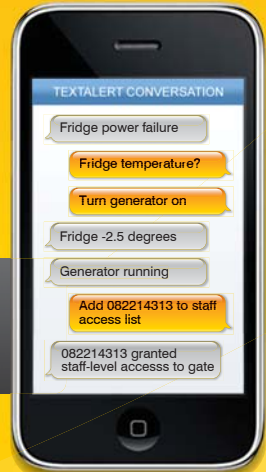

CommandAlert

Automate and remotely monitor & manage a huge variety of devices from your mobile phone e.g. gates/access control, refrigeration, irrigation, etc.

Perimeter Security

SMS function works on any phone

Telemetry Control

SMS function works on any phone

Easy installation • Wireless • Scalable • Affordable
